Commencement of Inspection

June 15. 1870.

Commenced the Inspection of the Infantry of Egypt Lt Colonel Jaha Bey Regiment 1st Division 1st Regiment of the **Sword**, the colonel was absent, the ^{Lt} Colonel of the Regiment remained in person with me, during the drill, together with the 2nd Major. The 1st Major drilled about 300 men + officers, saying that 600 formed the compliment of the Bataillon.

The Bataillon drilled near two hours, + went through in this time, nearly all the principal movements, and ended with each officer, drilling his company or peliton, the whole **including** with a Review.

The discipline was perfect, the soldiers ready and anxious to obey their orders, and the most commendable spirit of subordination + ~~gentle~~ disposition to excell was exhibited.

Their military appearance, unprepared at the time, in their summer dress, was clean, + soldierly ~~in their~~.

Their arms were clean + looked as though they were well kept.

The officers, ~~young~~ seemed ready + accurate in their instruction, and maneuvered both in the Bataillon + ~~Peliton~~ Platoon or Company, with that ease and self possession, which evinced a knowledge of the drill, under the orders of Maj. Bey. **ltm**

The 1st Major of the Bataillon, ~~who~~ handled his ^{men} with great skill, in the small Parade Ground ⁱⁿ which they maneuvered ~~upon~~, passing his Command ~~his Regiment~~ for two hours ~~in the small space~~, through nearly all the difficult Exercises, frequently of two movements, and during this continuous drill, dully sustained himself, + enabled the Inspector to satisfy himself, that the officers + men were well instructed in their drill.

The Lt Colonel + Field officers were well instructed + seemed to be fully acquainted with their duties.

And exhibited a desire to make the Inspection thorough.

To-morrow we go to the Guiser, with the Lt Colonel.

June 16th 1870

In company with Lt Colonel Jaha Bey Guards Regt. we went across to the Palace Geyseira, on the opposite for the purpose of seeing the Bataillon belonging

to his regiment + stationed here about 250 men + officers approved upon drill the remainder were on guard and other duty, the grounds we contracted, the houses were all separated for an entire regiment, one story + about 30 yards apart. Commanding + Field officers opposite quarters opposite. The command was drilled under the Major Commanding whose name is . They went through nearly all the evolutions of the line of any moment, + closed, with a drill of Platoon which is one Company, Bayonet exercise, + finally marched in Review in splendid order and good marching. After this the entire officers presented more, brought in and presented, I expressed to the pleasure I experienced in making their acquaintance + that I was an old soldier and was always glad to greet such good soldiers as they were. Like the other part of the Regiment, this drilled with great accuracy + skill the Lt Colonel again remained with me + gave orders to the Major Commanding to drill the Bataillon.

did it with consummate skill attributed by the officers + men who all labored to do their best, + certainly did it on this occasion + I so expressed myself to the Lt Colonel + his officers. He frequently gave us coffee + sigars, and gave me a handsome boquet which I brought home with me. The exhibitor some of in nostices, not unremarkable but they tried to please + I was willing to gratify them with the idea that I was.

He passed through the Palace garden + was delighted with its beauty + the choice exotics it contains. Together with its collection of wild animals, including two small sized Elephants, several Lions + Lionesses with their young, Ostriches, etc etc. Drove back to the Casar Nil + left the Major with many salaams etc etc.

June 17th 1870

Inspected the 3rd Regiment of the Guard now commanded by Lt Colo Leonchid Bihram Bey, the Colonel being absent on a mission, the Colonel of the 1st Regt of the Guard, was present as a spectator, Genl Stone also accompanied me + was present during the Inspection,

There were three Bataillons present at the Citadelle, making in all about 1500 officers + men. Others absent on Guard + otherwise, the organization is over 2000 men + officers, I cannot ascertain the true number until I get the report.

It commenced with ~~an~~ the drill of the Peloton, which ^{as} ~~on take on~~ all occasions takes the place of our Company. But for it of all they commenced with the firings, then the platoon drill, Bataillon Exercise, ^{+ parting of each Bataillon drilled at the} Bayonet exercise. ^{+ lasted about 15 minutes + then made a few movements} ~~with~~ the three Bataillons in one, in the form of a Brigade. The Company Commanders drilled their platoons or Companies, the Majors their Battalions, and the Bayonet Exercises. The Lt Colo drilled the Regiment entire.

~~The~~ The whole Inspection closed with a Review. Marching by with the left in front, officers saluting, and according to the customs, I returned each of their salutes. I suppose the reason of their doing this was because of the ground being difficult of changing front. They marched by in admirable order, exhibiting a degree of accuracy that reflected the utmost credit upon the Commander, his officers + men. The whole Exercise was done with skill soldierly bearing, in **Elegance** + a strong disposition to do their best. In which they succeeded + would reflect great credit upon any army or **sett** of officers. The drills were ~~done~~ executed according to the tactics and details were critically attended ^{to} + showed degree of knowledge, that **gravely** ~~of~~ reflected credit upon officers + men. Officers + men were intelligent in their movements, respectfull + obedient to their officers, no confusion during their Exercise, showing **ignorance** of either theory or practice. Their arms were in good order, + from the casual observation which I could give them, looked as though they were well kept. The general appearance of the officers + men was neat + soldierly, the dress fitting well, the **trat ensemble**, presented a handsome **protein**.

I informed the Colo that I should at **one** early day, inspect his arms, I also requested him to give me a report of his Regiment showing its organization, there present and absent. At the next inspection I **purpose** to inspect his prisons, Hospitals and the **caserne** of the men.

They were hospitable with their coffee + sigars, and in every way, kind and gentlemanly. The whole proceeding closed with ~~with~~ an introduction to the entire Regiment of officers in a line in front. I said to them through an interpreter that it was always agreeable to meet with officers, that I was an old soldier, and felt a great pleasure in seeing officers who so well understood their duties, and that I had every reason to congratulate myself that I had witnessed so a magnificent drill. I then bowed + then returned at the suggestion of the Colo, upon driving out they were in flank of forms + again saluted us.

June 20. Inspected the Bataillon of the Chasseurs of the 1st Division of the Guard, Commanded by Ali Effendi Fahmi, Major Command. The Command commenced drilling, shortly after sun rise at the Palace of Gereizet, and excised after about two hours, at the Bayonet exercise, Platoon drill and in Batallon drill. The commander first drilled his Platoon by his Company Commanders. The in person his Batallon which numbered about 300 men + officers, six companies, the companies drilled mostly in marching a few other movements sufficiently to show that they understood their drill. The Commander drilled his Batallon in most of the difficult evolutions of the line, double movements concluded, ~~made~~ ^{executed} the movement first of Playing on the centre Division, then Deploying on the centre Division, countermarching at the same time, this changing his front. Changed front ^{formed} on First Company + changed to the rear on First company etc.

The Commander showed a knowledge of his tactics, the men were not I think so thoroughly drilled as some of those I had previously seen, but still creditable to himself + officers + men. He exercised his entire command in the Bayonet exercise, in this he excelled in the same manner as the other commands I have seen. The most of his men + officers were young, and fine looking. I complimented him + his Command, but I do not think he was as demonstrative as some of the other commanders, still he was corteous + polite + offered coffee + cigarettes frequently, he also had connected with his command a mountain Howitzer — which his men moved + exercised. Altogether I was pleased with my visit after a pleasant ride there + back to breakfast. The early morning is decidedly the most agreeable part of the day for the exercises.

June 24 To day inspected the arms, knapsacks + quarters of Ali Effendi Fahmi Commandant etc of Chasseurs. His arms I inspected on his drill ground, the companies were in Column of Companies, there was no line formed as in review, ~~he~~ no presenting of batallon or company, the Company Commander simply presenting his sword as I came towards him to inspect his company, in this manner I inspected his arms, thoroughly and minutely,

they were the Remington Rifle + comparatively new. Never have I seen Rifles in better condition, brighter or cleaner, + this was without an exception in the entire command, the soldiers were in white, their clothes clean + fitted well their Fez well brushed, + their shoes shining. Their quarters, were as clean and everything about them looked as nice as it was possible to be, their arms upon going to the quarters were nicely stacked in the centre of their quarters, together with the arms not in the hands of the men. I counted, but may not be exactly right, 15, 18, 24, 16 respectively in the rooms, of each company. Their blankets were spread upon very nice mats on each side of the room, their knapsack, were neatly folded, apparently made of white cloth upon a **their** frame, the contents of the knapsack, was a neat full dress uniform, cloth coat + pants, blue + red, a shirt + a few other small articles of clothing, a small buck neatly folded containing, clothes brush, shoes brush, needle + thread, thimble + stopper for a gun, everything neat and in its place.

I neglected to mention that the company had old cartridge boxes, very old but very neat, each box containing 6 rounds of cartridges for each their Rifles. The blankets + other company property were placed in the end of each room + neatly folded and covered, their messing utensils were also in each room. I do not see their Kitchen. The inspection was thorough + satisfactory. I have a report which I will **notice** when translated. The company quarters, were old, apparently erected originally for temporary quarters, but are kept in admirable condition. The officers quarters are extremely small when compared with the quarters of the soldiers.

I am pleased with this entire command.

24 June

To-day about 4 ½ PM. While Genl Stone + myself were sitting in my quarters we noticed a trembling sensation in the House in which we were, we at first could not understand what the occasion was, I was in my draws + Robe de Chambre, I thought at first, they were moving something heavy in the building which is a large one, but upon going into the next chamber a salon, I became satisfied the building ^{a large stone 3 stories high} was either falling or that it ~~was~~ there was an earthquake, it proved to be the latter + lasted several minutes, ourselves and the inmates all fled to the street + found everybody there from other houses, I returned after my **purse**, the vibration still continuing. The same was experienced throughout the city.

24th June to-night Besides Monsieur Hammond + wife my French teacher Hekekem Bey, Colo Jennifer, Colo Dunlap + Capt Morgan were at my House last night, during this time, Colo W Iwer, Mr Esler +

Bey with a lady actress came to visit me + insisted upon going to hear the lay play, after entertaining them, the best I could, went with them + staid to a late hour Pas Guards chore.

25th- Capt Morgan has seen Col Curchid Beiham Bey and made an arrangement with him to inspect his arms to-morrow at sun rise at the citadelle.

26th June. Inspected the Arms + quarters of the Command of Colo Curchid Beiham Bey about 1500 men was about 3 hours, Capt Morgan + three Egyptian officers assisted, the Arms were in fine condition, the greater part of them were old + much worn, some few comparatively new the Chasseurs, were the newest in the entire Command.

They were a few from 10 to 20 in the quarters of the men, kept in a sack with those already inspected, they with the arms in the hands of the men were in admirable condition, nothing could have been cleaner in every respect. I have never seen in any country kept in fine order + cleaner, + reflect great credit upon the officers + men, they were several boxes of new guns kept in the Batallion storeroom, 6 or 8 boxes, containing about 12 guns in each box. They too looked in good order, the cartridges boxes of the Command were old, many of them much worn, some with difficulty kept together, now + then a few cartridges in them but seldom any. The old guns were very old French guns, + would be entirely unserviceable for field service, with the exception of one Batallion, there was little uniformity in the armament of the Command. The dress and quarters of the men were in fine condition. Their knapsacks were neat + their contents, clean + well folded, and only contained what a soldier should have, evidently great care is taken of the cleanliness of the men and their quarters. Their arms + their accoutrements, No old arms + accoutrements could possibly be kept cleaner + in better order than they were. I again observe here as elsewhere, the great want of attention to detail, they seem to have no informity of Inspection

Continued

They do not form for inspection with open ranks, neither do they present arms, to the inspecting officer except in single instances of **sentinels**, or men by **the** sabres, the officer simply presenting, and doing it whenever the inspecting officer approaches, they do not except in individual cases, open the ranks, unless **warned** by the inspector nor neither do they open the cartridge boxes, and in presenting the gun for inspection, it is done awkwardly and received in the same by the officer, who takes it, and generally hands it back from an order arms, and in handling it, frequently striking the men with it, + so in **handing** it back. The knapsacks are not considered + no effort is made to have them examined, until requested, and they do not know of the necessity of facing inwards + opening knapsacks for the **purpose**, the whole Review + inspection is out of rule, + so much so that it does not look ^{like} ~~thate~~ arms are frequently inspected by the officer, + yet they are in splendid condition reflecting in this respect more credit upon the men than the officer, the men handling the gun infinitely better than the officer.

I noticed ~~an~~ that an officer, served us with coffee + cigars in the place of an orderly. This may be the custom of the country, but I thought it out of place. I do not think that the officer or non-commissioned officer should be made to do service of this sort, but, everything to **devote**, when necessary a soldier or better a soldier. Another thing reported to me, was the striking of a soldier on Parade, with the scabbard of a sword, by an officer. This too may be allowed, but it **strikes** at the **root** of discipline and the proper respect that an officer owes himself and his men, and is only controlling by brute force, and not regulations and orders. Punishment should as a matter of course be inflicted quick + certain ^{when the ends of} justice + discipline is to be attained where the delinquent is **quietly**, + that according to the custom but never in anger or with an instrument not allowed, **the guards** not well instructed, **sentinels**, do not appear attentive, but are careless. I have not had the opportunity of seeing the Guards march on + off + therefore cannot say much just now on this point. But I hear that they show great want of uniformity. The same hospitality was shown here in sigars + coffee as **previously** + elsewhere.

Inspection of the Command at Abbasie

28 June 1870. Commenced at sun^{rise} inspecting the 11th Regiment of the Line, at Abbasie of Colo Mahmoud Jahir Bey. The entire Regiment present for ^{inspection} was about 800 men + officers, moved out in fine order + took position in front of their barracks. In their battallions, front towards the main entrance where, I sat with the Colonel who directed the movements. Between us + the Regiment, the Exercises commenced with ~~the school of the soldier~~

The school of the soldier, the Battallion stacking arms etc in this the men + officers seemed well instructed, in the movement of their limbs, great attention paid to the setting ^{up} of the soldier, + in the elasticity ^{+ accuracy} of the step, drill etc.

The Bayonet exercise, in this the men were not so well instructed as a rule, though ~~many seemed well taught~~ some were.

The Platoon drill — great attention paid to the step + conversions men + officers showed a proficiency in the different movements.

The Battallion drill, evinced a high degree ^{knowledge} of exercise in the evolutions of the Line, the different Commanders, were well informed + drilled with ease, in some matters of detail, in the fixing of guides in conversions + alignments, the same great attention did not seem to prevail, possibly the change of Guides was the cause, this frequently required the orders of the colonel ~~to correct~~, who was always on the look out to correct the slightest fault in detail.

During the intervals of rest, the men ^{+ officers} were engaged in **manly** + **becommings** sports, + the men + officers moved about in order + when called up, the whole command ^{moved} with great **colectivity**, took their places in Line, and with but one spirit to do their best in all their movements. In this + in going in + out of quarters, in their quarters, away on duty or other wise.

The discipline of the entire command was **perfect**, the officers + men, were always well in hand + **warned** + willingness + obedience to orders, reflecting great credit up the Head.

The Drill of the Regiment, under the immediate orders of the Colonel, was passed through many difficult Evolutions + **manouvered**, with great boldness + skill.

Mistakes of others rapidly correct + any matter

of the detail + false movement readily ~~corrected~~^{observed} + the Regiment moved, gracefully + in proper time observing distances with great precision, but seldom, Commanders of Battalions or Captains were at fault in their evolutions or conversions or in matters of detail

The whole Exercise closed with a handsome movement, by change of front in columns of Divisions + finally, the movement resulted in passing through the column of Platoons ^{as I recall them.} in Companies, + the whole passed ~~in~~ in Review, right in front, marching by + saluting, after this the regiment entered the quarters at a run, in fine order, though apparently great disorder.

Soon after the Exercises the colonel showed us that he taught his men **soon** after the ~~of rifle~~ first **coming** to **right** their gun from a stack of arms with a bag, so that the gun would rest in its place.

Guard mounting, the whole was done with a good deal of show but, either their system is entirely different from all others, or the proper form of inspection, formation, Parade + report of officers, is neglected, and defective + awkward in many ^{details}. The Relining of the Guard was done admirably and according to a good system, both officers + men here knew their duty. The Reports of the officer of the Guards + matters of detail + care + attention to prisoners, **made** of punishment for **nonofficers** + the Colonel being the soul **obitre** + ^{both for officers + men,} in all cases except where, ~~his~~ it is necessary to send to a Court Martial.

Few or no sick in quarters where any report, if necessary they are sent to the Guard Hospital, those slightly so are kept in quarters where, there is a Doctor always to attend.

Inspection of arms + men

The arms in the hands of the men were all of ~~the~~ an old ^{French} **Partialing since** absolute, Rifled + using the **rammings**. The guns were worn + would be useless for active service, the locks were weak etc. They were kept in splendid order, as clean + well looking as old guns could be possibly kept, their cartridge boxes + accoutrements were, also miserably old + worn, but kept in fair condition + where the were scarcely held together were patched + preserved by the ~~men~~^{soldier}. Nearly all had two bundles of cartridges in each box. The dress of men was faultlessly clean, even after all the exercises, of the day.

The Inspection as usual was entirely ~~the~~^{at} fault + done negligently by both by officers + men, the handling of the gun was even more careless^{by the officer} than the soldier who seemed desirous of doing his best to please + ^{in his case} is more the fault of ^{not learning} ~~teaching~~ than other wise, when approaching there was no present except by the officer commanding the company, + no opening of ranks, springing of rammers or opening of cartridge boxes, + when opened the men were not instructed to keep them open. In fact there seemed no system for inspections, the men were without knapsacks. In presenting the gun^{for inspection} the company^{being} at ~~are~~ order arms, when the inspecting officer approached, the ~~men~~^{soldier} lifted the gun from ~~as~~ an order to a present + when the officer ~~was~~^{is} through with ~~through~~ the gun, usually as he lifted the the ~~rammer~~^{for the wing} from at an order he handed it back into the hands of the ~~men~~^{soldier}. (who necessarily had to drag it to its place) + sometimes in a manner to strike the soldier in the face or on the shoulder.

The Quarters of the men + the whole Barracks inside + out was as clean + in as good order as it was possible to be, the gun of the man nicely kept in a rack, + proper attention paid to its cleanliness + preservation.

The Magazine Room, was in fine condition,^{containing} ~~but~~ but little in a huge room, except the Rifle (Remington) for the Batallion of Chasseurs belonging to this command, and not yet taken out the boxes for distribution.

They were hospitable + kind giving us very fine collation, with good claret, Viche water, ending with a bottle of champagne, they had a large number of courses, + beautifully set tables. The Room was large + comfortable + a fresh breeze blowing, sigars were abundant + coffee distributed ad libitum, we returned home at about 6 ½ PM very much fatigued with our visit + labours.

29th June Crdo. Mr Ecclers + Cami Bey dined with us in the evening Stone, Jennifer, Pairings, etc.

30th Col Couchid Birham Bey + two Commandants called upon us in the morning. In the evening Colo Mahmoud Jahir Bey dine with us together with Madam Hammd + her husband.

1st July Went to see Stone, Jennifer etc.

2nd July Closed accounts to day with Joe + Capt Morgan + commenced de-novo.

July 4th Visited Cazr Nil + witnessed Guard mounting. The inspection is mostly done by the non-commissioned officers, (Corporals + sergeants,) in the company quarters, or on the balconies, the Command on guard is drawn up in line, ranks opened but no officer or soldier steps to the front, the Commander of the Battalion gives all orders for the inspection + inspects by simply, moving up and down the line the soldier raising his gun for him to see, after this he summons the officer to the front and gives them orders, + then the guard is marched by company or division in slow time + afterwards in quick time back to near this place of assembly where the different commands are marched to their destination, the relief of the guards is done according to ~~orders~~ a good system. The sunrise was the Bugle + drum, no band.

The marching + appearance of the guard was good, and everything about the caserne was in good order.

Saw several officers, among them the ^{Lt} Colonel of the 2nd Guards now on leave, to be gone six months.

Found ^{him} a highly intelligent + accomplished officer, spent four years in ~~the~~ Berlin at a Prussian school.

His name as I make it is Jussuf Shuhdy Lt Col de Said.

July 13th 1870 Left Cairo for Suez to Inspect the Batallion of Chasseurs ^{belonging to the 3rd Division +} stationed the + Commanded by Abdul Allemuin Effendi.

Arrived there about dark, leaving here at ½ pas 8 A.M. Stopped at the English Hotel, large, good beds, but poor leasing at about 5 dollars per day, the poorest I ever saw for the money in any country. + There to clap the climax the accountant cheated in the settlement of 6 francs, finding us with Egyptian sovereigns, he refused to take them at the market value. 1 franc more than the English sovereign.

this was the 13th

Found the Commander absent, the Adjutant Major ^{who is named Korsofi Effendi} called to see me, + asked as it was Thursday the next day ^{14th}, to postpone the inspection until the day after ^{the 15th July}, as that was the day **the** cleaned up, to which I assented. The next morning at sun rise ^{the 15th July} ~~I was present, they~~ ^{the} commenced by drilling at the school of the soldier, this was well done, then at Bayonet Exercise, then Platoon drill which in marching was good, and the Exercises of the Batallion.

The Exercises in the school of the soldier, showed the very highest instruction + care, the entire command being drilled at it.

The Bayonet Exercise, ~~but~~ was not so well advanced, the Command undergoing instruction, the officers understand the drill, but the men are not yet proficient.

The Platoon Exercise, was very good in the step, marching well + conversions good, the officers were well instructed.

The Manual of Arms, showed high degree of instruction, time excellent.

The Batallion Exercise, showed the ~~Commander~~ ^{Adjutant Major}, who was in the place of the regular Commander, was well instructed + drilled the command with ease, the subordinate doing their best to excel, drilled for several hours.

Inspection of the Command.

The arms in the hands of the men are the Belgian Rifle ^(old Patient) muzle loader. In very good condition, very clean, the same with regard to the accoutrements, ammunition, in fine condition.

Dress of the men was faultlessly clean, knapsacks good and containing only the necessities of the soldier, canteens of leather in fine condition.

The command in tents, camp well schooled in regular order, extremely neat + well kept, the arms in the tents nicely stacked, all about them simple + well arranged.

The new arms ^{Remington} cleaned + not yet used, kept by each Company in a separate tent and well preserved.

The Surgeon Mahomet Ali, in charge of the Hospital, + sick, extremely well informed, able + attentive few or no sick, few prisoners.

Discipline of the very best. Military appearance very good. The Review was admirably

conducted. The guard well inspected, and all about the command evincing very high order of attention to the interior economy, the messing of the officers + men good, the **corking** + **caserne** well conducted.

Before leaving, Major Abdul **Alhamlin** arrived + regretted much his absence, found this young officer, highly intelligent active energetic, and ambitious of excelling, I am satisfied from my ^{frequent} intercourse with him, that he thoroughly understands his duties, and his high intelligence + acquaintances with his duties is to be **attributed**, the excellent condition in which I found his command, its high state of discipline its cleanliness + military appearance + the proficiency in the Exercises.

There were about 500 men under arms + on drill. The evening before I left the Adjutant Major, + Dr. Mehemit Ali the surgeon of the Command, + subsequently the Commander Abdul **Alibebinin** who had arrived came to see me, the latter was extremely sorry that he was absent, and begged me to stay over another day, but this I could not as I had remained over one entire day to serve the command, but told him that his Command had been thoroughly inspected etc. The next morning, the Governor an Itallian (old man) the major called to see me + went with me to the cars with the Doctor + major altogether they did all they could at Suez to make our time agreeable. Furnishing us with horses to ride to camp there being none to hire + no carriages in the city of Suez. This city had a population of 20.000 a little over a year ago, it has now but about 10.000 inhabitants, nearly all the foreign population has gone to either **Port Said**, Alexandria Cairo etc or left the country entirely, they explain a good deal that the Canal which commences a little over one mile beyond the city, having taken from them nearly all their trade + travel, of which they sorrowfully explain.

Returned to Cairo on the 16th July.

13. 14. 15. 16.

The following is the number of officers + soldiers under arms ^{on the morning of the Exercise} at the different inspections and Exercises during my stay at Suez. 509 Rank + file. Number of arms inspected — 658 Belgian Rifles, 658 Cartridge Boxes, 683 knapsacks ^{658 screwdrivers}. 658 Remington Rifles Boxed + new.

~~Friday~~ Left Cairo on the 20th of July for Alexandria arriving the same day by Rail, + stopped at the Hotel D'Algerie Angleterre, the next day being thursday, I did not ~~inge~~ a drill, but gave them until friday to commence, the other day ~~an unresing to our~~ Saturday, they use it to clean up.

Friday 22

Inspected the 4th Regiment of the Guard, Mustapha Bey Colonel being absent, Hourchid Jahir Bey Lieut Colonel Commanded, at ~~Ras-el~~ Ras-Eltin + numbering 1408 Rank + File.

Major Mahomet Chaoki Effendi

Major Mahomet Izat Effendi

Commandants of Batallions.

Major Mahomet Gabz Effendi

Achmet Effet Effendi

Adjutant Majors.

Mahomet Saidek Effendi

Commenced the Inspection soon after sun rise, with one Batallion drilling at the Bayonet, Exercise, one at the School of the Soldier, + one at the Platoon, there being different fields for them to drill. Subsequently, one of the Batallions drilled as one entire Batallion, there being no room for them to Exercise the Entire Regiment ~~the whole Regiment~~. Closing this part of the drill with a handsome Review, Right in front.

Before the drill Inspected the Arms, found them furnished with the Remington gun, but the old Equipments, worn and out of date but so far as they could keep them so, in first rate order, the old knapsack, this was kept also in first rate order and packed with only that absolutely required by the soldier and as neatly packed as I ever saw, their screwdriver etc kept in the knapsack. Their knapsacks were well raised so that it was more convenient to look into them, they all contained two packages of powder etc in good condition. The Guns were new + kept faultlessly clean, the dress of the men, in fact the whole tout en-semble was in the most perfect order.

They drilled at the School of the soldier, from the initiative lesson first administered to the Recruit + so on through to the Platoon, the non-commissioned officers + sous officers were all well instructed, + grounded at this + showing that this drill is not slighted + that the Command is conversant with their business, practicing them also at sighting. The object of this drill was to see their manner of instruction as well as the proficiency of the sergeants + corporals.

Manual of Arms

As perfect as it was possible to be, the whole drill was as accurate + well timed as it was possible to be, the firings, kneeling both ranks was admirably done.

Platoon

Now + then they slighted, but as a rule this drill was admirable.

Bayonet

Nothing could excell the skill and accuracy of this Exercise, an entire Batallion, was selected, + the whole drilled with that precision + ease, with + without numbers, showing the perfection of drill, and appearing as one man. I looked to see a fault, but found the Exercise as perfect as I ever saw in any army, better instructed than I have before seen.

Batallion.

The Batallion drilled in many of the movements, some could not be gone through with for want of room, with a few faults in the Exercise it was good.

The Review was exceedingly well done right in front.

The Inspection as usual was defective. The Military appearance + bearing of the men was admirable throughout.

Quarters were as clean as a new line + all well arranged.

Consine —was well arranged.

Medical Department— Doctors, compitent + but few sick

Prisoners

Few prisoners.

Firing the 22nd July

Saw several officers, Sergeants, Corporals + Privates shoot at a mark, 200 yards with the Remington, every one struck the mark but one officer, the shooting was admirable I selected the company at random, 3rd company in the 2nd Battalion. So that it was fairly selected.

They insisted upon my staying with them to dinner or rather breakfast which I did. Found them polite, hospitable + kind, + in every respect considerate. I invited the Lt Colo + 1st Major to dine with me + they did so at the Hotel D'Angleterre.

The Remington cartridge is defective etc.

Saturday 23rd July 1870. Inspected at ~~Coupari~~^{Cabari}, 16th Regiment of the Line, in the absence of its own Colonel Commanded by Kalid Bey Colonel of the 15th Regiment + numbers 697 Rank + File.

Major Achmed Effendi Helmi + Commanding Battalions

Major Mustapha Effendi

Commenced the inspection shortly after sun rise, found the Colonel with the Command two Battalions, waiting opposite the Palace built by Said Pacha, the parade in front of him, bad to walk to walk on, Said to have constructed to keep the dust down, when soldiers were drilling, much better when the dust is there. Drilled the Command the most of which has just returned from walking upon the fortifications, in the school of the soldier found the Sergeants, Corporals, + men pretty well grounded in the early teaching. In the platoon, a good many well drilled soldiers, but the men look as they were being instructed, ~~Battalion~~ the Commanders, passed their Battalions through several Evolutions of the Line + were well instructed but the men + ~~comm~~^{non} commissioned, were not thorough, I attributed this to the fact that they had just come from working upon the fortifications. In The Bayonet Exercise, they were being instructed, the marching was all good, the conversion + guides showed the want of instruction. The Guard mounting was according to the system conducted through handsomely, with a very good band. They seemed thorough in their duties. The arms were mostly old, but were kept in as good order as it was possible.

The knapsacks were well + neatly packed, the men were clean and everything about them, looked as though as well as it could, their quarters were faultlessly clean, their guns were well stacked and all the appurtenances were gotten up + arranged in the best possible manner. Their **Cuisine** seemed well attended to + the Hospital was, conducted in the proper manner, few or no sick there extremely so were always sent to the general Hospital. Breakfasted with them + ~~left~~ received very kind of Hospitality, cigars coffee etc.

Monday 25th July Inspected Battalion of Chasseurs ^{4th Divisions} Commanded by Rachid Effendi Khamal, Major, at ~~Rasaton~~ Ras-Eltin + # Commenced with the inspection of arms, there were the new Remington Rifle, of course faultlessly clean, the cartridge boxes, were old + [page ripped] but yet they had, the ammunition screwdrivers, **wiper** etc in it, it [page ripped] only command so far in this respect, that had everything perfect, the knapsacks, were well + neatly packed, and everything well arranged. The Military appearance, cleanliness + dress of the command were faultlessly clean.

Commenced with the Exercise of the soldier, in this well instructed, Platoon very well, the Bayonet extremely well, seldom at fault, very good but not as good as the 4th.

The Battalion was well instructed, its commander well instructed + the officers seemed to know their duties, now + then at fault in guides, not taught, so that the commander + officers were always on the lookout, to place them properly. After a continuous drill, the Command passed in Review + presented a fine Military appearance, marching with precision + accuracy, closing with a guard mounting, which was well done.

Quarters etc in the best possible condition.

Breakfasted + throughout was hospitably entertained.

Tuesday ^{July} 26th. 1870. Commenced Inspection of 17th Regiment ~~Babskaki~~ ^{Bab-Charqui} (Gate) commanded by

Colonel ~~Mahommed Musad~~ ^{Massoud} # Bey,

Majors Ali Effendi **Side Key**

Commanding

Major Muhammed Ali Effendi

Batallion.

Commenced his inspection ~~of~~ with one Battalion, at the school of the soldier, commencing with the instruction of the recruit, and carrying it through to the Platoon, showing a high degree of instruction in all the different schools of instruction.

Platoon

Well instructed, both officers + men

Bayonet Exercise

They were very well instructed in this Exercise though not Exercised in all its instruction, sufficient to satisfy me that the instruction was considerable.

Battalion Exercise

Showed the Commanders as well instructed, now + then all fault in guides + conversions, marching was admirable, upon the whole the Command had a thorough knowledge of their drills.

Regiment.

The Colonel put his Regiment through a great many of the most difficult ~~branches~~ Evolutions of the Line, always with accuracy + skill, correcting with ease the least fault, in others, and ending with perfect symetry in alls his movements, the men stepping off in good time + with measured tread. This is a fine drilled tactician.

Discipline.

The discipline of this command, is perfect, the Colonel well balanced, Exercises his duties with firmness tempered with mercy, and knowing and watching its good order, has a command very creditable to himself + his officers.

Quarters.

Though not as well furnished as some, yet they are kept in admirable order, everything in its place, the arms well protected and arranged.

Surgeons

Competent and attentive to their duties, few sick, the very sick always sent to the general Hospital.

Guard House

Well arranged and kept in order, few or no prisoners those mostly for minor offenses, some few overstayng leares.

Review

Admirable, fine military appearance, the military bearing of the men good, obedient + orderly in and out of the Caserne. The Command marched Right in front and looked well.

Inspection of Arms.

The arms in the hands were ~~the~~^{an} old French utterly useless for field service, locks weak + rackety, but as far as they can kept in the finest possible condition, so with the cartridge boxes + knapsacks all old + worn, but kept together by proper + careful use. The latter were as usual neatly arranged and packed, the overcoat ~~packed~~ folded according to regulations, everything, clean brushed and in good order.

Standard + Colors

Received + Returned according to the best system

Inspections

The Inspections as usual were according to the manner I have all condemned. The officers do not appear to understand the proper manner, at fault in in handling the gun, cartridge boxes + knapsacks, but anxious to do everything well.

As usual, hospitable + courteous, breakfasted with the Colonel, at the Residence of admiral

a retired officer who speaks English well + though a Turk is married to an English Lady + lives according to the English Style. We had wines + a good breakfast. The Major Genl + the Navy Captain was there, the two Majors + the Colonel with Morgan.

Left Alexandria Friday 29th day of July for Rosetta by the way Dahmanhour, where we arrived at 10 AM + was delayed until 5 PM. In the want of the Governor to whom we had a letter directing us to apply to him for transportation, and we to pay for it, which we thought extraordinary, was furnished with a small boat paying 7 francs to Fahman waddich where undo his canal at the Lock. Here another Governor gave us a boat which we had for to Rosetta, paid 8 francs, arriving at day light + put up with Genl Sibley, Ward + Hunt. Called upon the Governor Khazarofi the same day July 30th, he informed me that the troops would be ready for inspection on the 1st August.

31st July Governor came to see me, + invited me to dine with him + Present at the dinner Sibley Ward + Hunt + the two Colonels Comds Rgts of Impty + one Cumds Artillery. Had music Arab + suipy had also Band. Staid until eleven oclock.

August Inspected the 7th Regiment of the Line, Commanded by ^{Colonel} Zaceharia ~~Bey~~ Helmi Bey.

Numbering officers + men. Rank + File 1511

Inspection of Arms + accoutrements + dress

The arms of this Regiment are old altered flint locks and longtime in use, the same with the accoutrements, the guns a loosely held together + the cartridge boxes are very old + worn. The arms are kept in the best possible condition + falsely clean the cartridge boxes faultlessly clean, + powder in good condition knapsacks + + neatly packed, + only the simple wants of the soldier in it. Men neatly clad + clean, as usual awkward in their inspection.

School of the soldier.

The men well grounded + the non-commissioned well instructed, fine looking + seemed intelligently to impart their instruction, in this did well.

Platoon.

The officers + men well instructed, now and then at fault in guides + conversions but as a rule well done.

Battalion Exercise.

The Commanders were all skilled in this Exercise, whenever, their men were at fault, rapidly corrected, and though now then guides were not instructed, arising no doubt from the fact that they were but **shortly** from very hard work upon the fortifications and in consequence the conversions were not always so good, yet there was ample evidence, that great care had be exercised in the instruction + grounding of officers + men in their duties, and that the Commanders knowing their duty were not responsible.

Manual of Arms.

In this drill, the exercise was perfect, the time accurate, showing the very highest instruction.

Bayonet Exercises.

Was good, improving, the officers seemed well instructed + imparted it admirably.

Discipline

Very good.

Quarters

In fine condition

Regimental Exercise

The Colonel in Command, drilled his Regiment in a contracted spaced, studying both the ground + Exercise, with admirable skill put his Regiment through several of the most difficult evolutions of the Line, ~~all~~ always with precision + accuracy showing himself ~~an~~ tactician of the highest order, imparted his orders and instruction with ease + moving his Regiment gracefully, in a word thoroughly understood his duties. I left the drill, with the impression that he was acquainted with the whole **routine** of drill + **favorable** to him in every respect.

His guard mounting was after their usual system + exceedingly well conducted. Dined with him in company with the Governor, Sibley Hunt, Ward, Morgan + the Colo + other officers of the 7th + 8th.
Returned about 9 P.M.

Inspection of the 8th Regiment of the Line commanded by Colonel Nechmil Deea Bey numbering 1677 Rank + File.

Arms + accoutrements

Commenced the inspection of the Regiment at sun rise on the 2nd August.

Inspection of Arms + accoutrements

Arms old + worn + the accoutrements in the same condition, though old + loosely held together, they were all in admirable condition, the cartridge boxes, clean, the ammunition in good order, the knapsacks neatly packed + clean, their dress was as usual faultlessly clean, the men + officers presented a fair appearance, + though but recently from work, were in the best possible condition.

School of the soldier.

The men + non commissioned officers were well instructed, + showed great attention in setting them up, the men were **silent** and military.

Platoon.

The Captains + sous officers were well instructed, like the 7th now + then at fault in the guides + conversion at times in consequence not so good, but this I attributed a great reason ~~that~~ to the fact, that they had some of them just returned from the hardest possible work upon fortifications.

Batallion

The Majors were ~~very highly~~ acquainted with their drill, all did well, one Said Effendi struck me as rigorous + skilled, bold + active his movements, putting his Batallion through many of the difficult evolutions, always to exhibit the highest talent, + command of his men.

Regiment

The Lt Colonel commanded the Regiment

the ^{Colonel} complaining of having been unwell for several days with a fever. As far ~~the~~ as the contracted ground would enable him, this officer drilled, two Battallions, the officers + men seemed well instructed, but owing to the want of sufficient ground, this officer was unable to extend his Exercise. It returned itself again into Battallion Exercise which was well conducted.

Manual of arms.

This Regiment is admirably skilled, nothing could be better, time well + accurate.

Bayonet Exercise

The same as the 7th, undergoing instruction but very good.

Discipline

Very good

Midical Department

Few sick, the Midical officers good + attentive to the sick, but few **on** the report. The Hospital in as good condition as it was possible to be, under the circumstances.

Closed the proceedings of the day with a handsome guard mounting, according their system.

I forgot to mention that both of these Regiments gave me very handsome Reviews.

Dined with the Colonel. **Present** the Governor Colo of the 7th, Sibley, Ward, Hunt, Morgan, + the same Colonel of the Artillery who had been present on a former occasion, remained until 10 P.M. when we returned home,

2nd August 1870 Went to see the Governor to get from him a boat this we succeeded in doing, for the next day.

3rd August 70. Left Rosetta onboard of a Diabeehas ^{Bateau} for the ~~Cananal~~ ^{cannal} **duesouth** for Damanhour, leaving at 1PM reached the Lock at night, soon after procured a Diabeechar + started for Damanhour which we reached at day light, paid for this trip about \$10.00.

About ½ mile from the landing through the village to the Depot, where I saw again the two Capts in charge of the Depot, who had been polite to me before.

Staid here until of 10 oclock, when the train came ~~to~~ found Stone was onboard + was told the Minister of War was also there, they and all the Pachas and high officials were returning from the reception of the Khedive, who had arrived from Constantinople, reached Cairo about 1 PM, + was glad to get back home.

August, 5 Genl Stone + Colo Dunlap spent the morning with me.

2 August Inspected the 3rd Regt of the Line commanded by Lt Colo Hourchid Birham Bey. The Regiment drilled, in a number of the Evolutions of the Line, + executed very well. Present with me Colo Reynold, Capt Morgan, Mahmoud Effendi, **Sous Santenant**, Colo Skinner of New York.

Tuesday 27th Sept. 1870 Inspected ^{near the citadelle} the 1st Regiment of the Guard Commanded by Colo Abde Kadir Bey Inspected the arms found them (Remmington) in fine condition, knapsack ^{well packed}, + cartridge boxes, old + worn, but all in good order.

The soldiers faultlessly clean, shoes well blacked, buttons + bright.

The exercise of arms was extremely good.

Manuel of the Firings ~~+ practice with~~ the ^{new} arms was good.

Bayonet Exercise was admirable.

The Drill of the Regiment there battalions under the eye of the Colonel + under the immediate ^{orders} of the Lt Colo Was was exceedingly well executed. Altogether the Exercises + maneuvers, + drill was creditable to the able + accomplished Colonel, his officers + men. I think I can observe a great improvement since I saw the same Regiment on the 15th June last.

I neglected to write that I inspected the Infantry school on the 3rd September 1870.

Oct 1st Inspected

Inspected etc the 5th Regiment of the Line 1080 under arms commanded by ~~Abdul Agiz Bey~~

During inspection # drill Captain Abdul Agiz commanded 2nd Batallion + for a time Lieutenant Abdul Rachman Effendi + commanded 2nd Batallion—both remarkably well. Capt Mousour Effendi Hassan commanded 1st Batallion formerly a soldier Arneed Housni Effendi Captain Commanded the 3rd Batallion formerly Military school. Was not so well pleased.

3rd Oct 1870

Inspected etc the 6th Regiment of Infantry, Commanded by Lt Colo Mahommed Nazib Bey of the 5th Regiment.

One of the Commandants was Jiram Effendi Bace formerly a soldier, a very fine officer, active + intelligent. Captain Abdul Raman Effendi Aboo also promoted from the ranks, drilled the Batallion with skill + energy.

Altogether this inspection was highly creditable, for a Regiment but fifteen days from 7 months lease of absence, + I came away pleased.
